

BFC Cyclone

Condensing Glass-Lined Water Heater

BFC - 28/30/50/60/80/100/120

Fully room-sealed condensing high-efficiency water heater **109%** (nett) • Automatic gas/air premix burning system including burner modulation • Delivered with low-maintenance inert anodes • Efficiency 109% (nett) • NO_x emission ≤ 30 ppm (dry – air free) – NO_x class 5 • Whisper quiet operation (<45 dB(A) at 2m distance from duct) • Varying water temperature setting from 40°C to 80°C with use of week timer • Flexible flue options (maximum length 100m) allow installations to be placed almost anywhere • Easy fault diagnosis and computer controlled digital week timer • Programmable for legionella purge cycle • Voltage-free contact for general fault indication to BMS • BFC Cyclone 80-120 are delivered on steel base for convenient transport and installation

Features and options

- Fully room-sealed condensing high-efficiency water heater 109% (nett)
- Automatic gas/air premix burning system including burner modulation
- Delivered with low-maintenance inert anodes
- Efficiency 109% (nett)
- NOx emission ≤ 30 ppm (dry – air free) – NOx class 5
- Whisper quiet operation (<45 dB(A) at 2m distance from duct)
- Varying water temperature setting from 40°C to 80°C with use of week timer
- Flexible flue options (maximum length 100m) allow installations to be placed almost anywhere
- Easy fault diagnosis and computer controlled digital week timer
- Programmable for legionella purge cycle
- Voltage-free contact for general fault indication to BMS
- BFC Cyclone 80-120 are delivered on steel base for convenient transport and installation

In the instruction manual you will find all the necessary information regarding connection, installation and maintenance of the product; including information on the electrical connections.

Information regarding the recycling or disposal of the product can also be found in the manual. This manual is delivered with the appliance and can also be found on our website; www.aosmithinternational.com.

Optional: Theta Dual Service

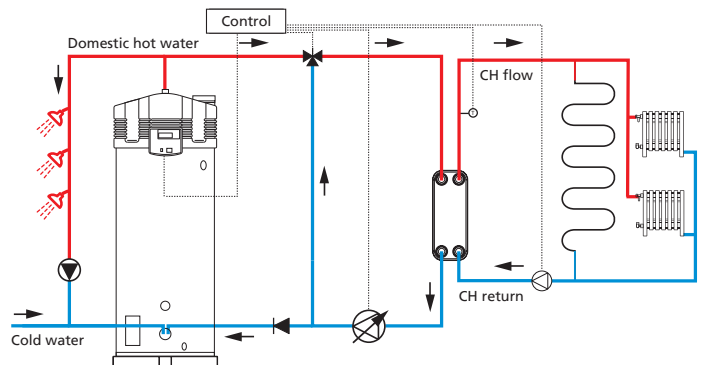

Theta dual service means using the available hot water from one of our water heaters for both domestic hot water (DHW) and heating. Dual service can be used in combination with a BFC Cyclone, SGE or SGS system. This is a perfect system for locations where a lot of domestic hot water and a little bit of heating is requested.

The intelligent control uses the available hot water very efficiently to meet the heating demand from one system without compromising comfort levels.

- Plate heat exchanger – single separation (a double separated plate heat exchanger can be delivered upon request)
- Control with communication cable
- Primary DHW pump
- Temperature sensor with cable incl. clip
- Three-way mixing valve including cables
- Instruction manual

Installation options

Further information on the flue gas discharge materials can be found in the Installation Manual.

A BFC Cyclone water heater should be installed according to category B23, C13, C33, C43 or C53*.

	BFC 28	BFC 30	BFC 50	BFC 60	BFC 80	BFC 100	BFC 120

Equivalent/bend 45° (m)	1.4	1.4	1.4	1.4	1.6	1.6	1.6
* All BFC Cyclone are also approved for installations where the unit is supplied without venting materials (C63).							
Concentric flues							
It is not permitted to use more than the specified number of bends, even when the duct is shorter than the maximum length. A 45° bend is equivalent to a 90° bend.							
Parallel flues							
- The maximum permissible length should be reduced by the equivalent length of each bend. (Note: for a parallel installation this means that 3 changes in direction amount to 6 bends (3 in the supply duct and 3 in the flue).)							
- The maximum length also applies if a parallel installation has different supply and flue duct lengths (B23, C53).							
- Combined flues (C43) shall be fitted with a condensate drain.							
Note: horizontal flue runs must be installed with a fall of at least 5 cm per metre.
